## RICE POLISHER

### FEATURES AND FUNCTIONS

- Rice Polisher is designed basing on a friction between rice against other part in polish chamber combining with atomized water to take bran out of the surface of rice and making it more shining.
- Automatically opens the feeding valve as materials is full and automatically closes as materials is empty or in case of emergency.
- Water spray system will automatically open after materials is supplied to friction chamber and automatically closes as out of materials.
- Bran peeling rate: 5%, low broken rate.
- After passing machine, finished rice have high whiteness and shininess.
- Machine structure is strong and firm, the moving parts are balanced carefully.
- Rice Polisher can be used for parboiled rice, green bean.
